Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-16, 18-23 drawn to a method of manufacturing rare earth magnet, classified in class 29, subclass 62.
 - II. Claim 17, drawn to a radial air gap, magnet motor, classified in class 310, subclass 156.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case a magnet can be manufactured in other way than by deposition process like oxidization and also process of depositing element can be used in any chemical surface anodizing or plating. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
